Management data

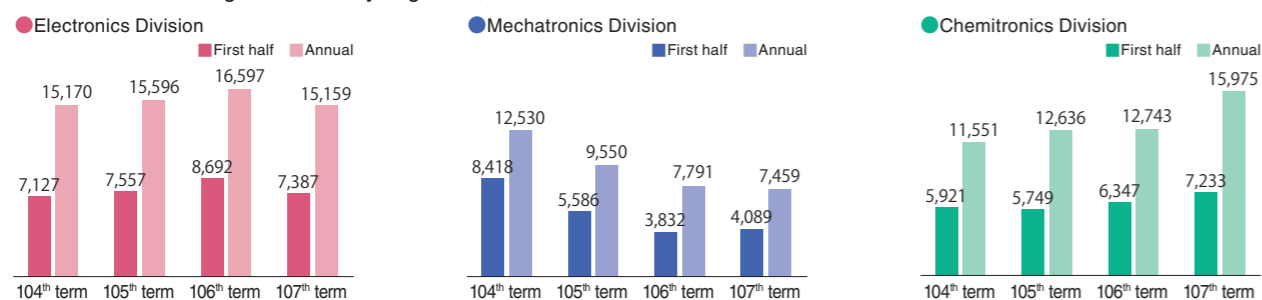

Concerning the 107th fiscal year settlement

In the overseas market, especially in China sales in computer related equipment, electric appliances and communications supplies are thriving and our market share is growing. In the domestic market, however, business investment in power supplies for the communications supplies and electric welding machine market is weak and an intensifying price war have created a continued adverse environment. In this climate, thanks to further expansion of sales activities and improvements in performance both overseas and in Japan, our net sales reached 38.5-billion 94-million yen. Profits are suffering due to the ongoing price war, which combined with stiffer competition from new entrants, has reduced prices and created a harsh business climate. Efforts to increase efficiency throughout management, lower original costs, and raise quality in addition to sales of high-value added products overseas resulted in an operating income of 3.4-billion 42-million yen and an above the line profit of 3.1-billion 46-million yen.

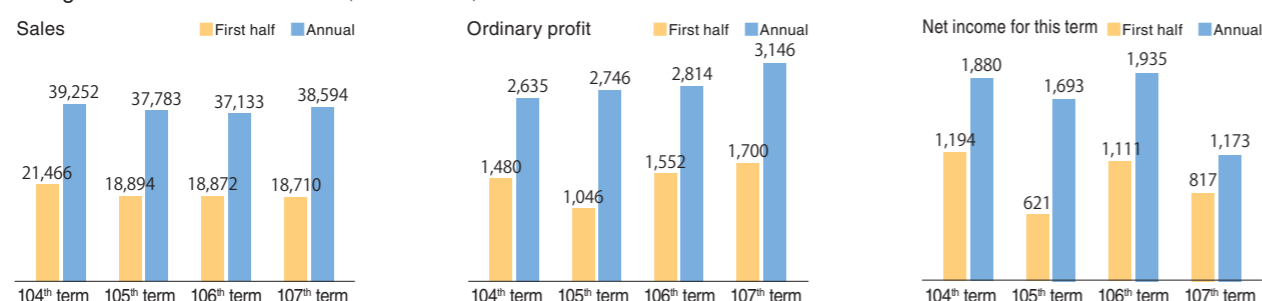

■ Consolidated sales high percentage ratio by segment (In units of millions)

■ Consolidated sales high transition by segment (In units of millions)

■ Change of consolidated accounts (In units of millions)
